Jamie - pre-spill is a good idea. We'll also need some locations shown on a map. If you can get flows on the Little Muddy USGS station closest to the spill (This can be Monday.)

Thanks

Hey Steve-

I am putting your table together and I just want to make sure that I'm getting everything you want in there. so, according to all the data I've been given, the only results we have so far are for ND DOH samples collected from Jan 7-15. We are still waiting on results for the samples START collected and Will with USACE told me that he was waiting on their results for the samples from Jan 27. Will gave me some results for their regular sampling event on 12/10/14-would you like me to include those in the table? I wasn't sure if you wanted pre-spill data included.
